

How to Know What is the Best Gutter Guard for Your Home?

Finally decided it's time to get a gutter guard for your home? Here are a few tips to help you make the right choice.

Things to consider when choosing a gutter guard system

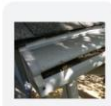

- ▶ **Your Roofing** - The roofing system installed at your home plays an important role in choosing the right gutter guard.
- ▶ **Foliage Around the House** - Figure out what type of gutter guard is best suited for the kind of foliage you have around your home.
- ▶ **The Heavy Debris Issue** - See whether it can effectively keep the heavy debris from entering the gutter and clogging it.

- ▶ **Effectiveness in Heavy Rains** - Find out if the gutter guard can channel the rainwater away from your house even when it rains heavily.
- ▶ **Corner Debris Buildup** - Understand how the gutter guard system deals with the inside corner debris buildup from the roof and the upper-level downspout.
- ▶ **Warranty** - It is extremely important to ensure that there is a warranty on products as well as workmanship.

Types of gutter guard systems available

▶ **Reverse Curve System**

▶ **Filter System**

Installation methods you can choose from

- ▶ **Composition roof installation**
- ▶ **Tile and shake installation**
- ▶ **Low slope or built-in gutter installation**
- ▶ **Metal roof installation**

Important points to remember

- ▶ **Before choosing the gutter guard, it is recommended to have an onsite inspection done to find out about**
 - Types of debris
 - Height & corners
 - Possible hazards
 - Water control issues on the property, if any
 - Any existing damage to the plywood

- ▶ **Only trust in gutter guard installers that actually answer all your questions regarding the working of the system.**
- ▶ **Make sure that if and when you require their services, they can make immediate service calls.**
